### Rationale

There are three main reasons that necessitate this policy:

- A) When a student is not in class they are not learning.
- B) When a student is not where they should, this becomes a significant safety concern for the student.
- C) Students who truant place an unacceptable strain on human resources when they are not where they should be. Often there will be several adults looking for the student(s) if they have not presented to their scheduled class.

### Implementation of Policy

1. Truancy is defined as a student not attending their scheduled class and they do not have permission to be in another location on or off school grounds while in the care of Kuranda District State College staff.
2. A student is required to attend their scheduled class that they are enrolled in.
3. A student must have permission from College staff to be in an alternative location to their usually scheduled class or activity.

### Procedures for non-compliance

4. A student will be redirected to class in every instance that they are not in the correct location.
  - 4.1 A student's refusal to follow reasonable instruction given to them may result in an after school detention or other school-based consequence that will be discussed with the student's parent or carer.
5. Students who have left school grounds or who are located in the surrounding agricultural or forest will be given an automatic after-school detention and a warning on every occasion.
6. When a student has received two warnings, on the third occasion of truanting a class, the student may receive a Student Disciplinary Absence (SDA).
